## **Provider Offshore Operations Attestation**

PacificSource is responsible for meeting standards for multiple federal and state regulations as well as accrediting standards and fulfilling obligations of contracts with various groups. As a contracted entity of PacificSource you are also responsible for complying with these requirements and must ensure your contracted entities comply with applicable laws and regulations.

Work with offshore subcontractors that uses member protected health information (PHI) may be required to be reported to regulatory bodies as well as ensuring certain security measures are in place.

You must request permission to perform offshore services or to use an individual or offshore entity to perform services for PacificSource members. "Offshore entity" refers to an individual or entity physically located outside the United States or one of its territories. The only acceptable approval is from an authorized PacificSource representative obtained in advance and in writing.

If you already use an offshore entity, let us know right away. Simply email the person from whom you received this attachment.
