

# Get \$0 specialty medications with PrudentRx

PacificSource has collaborated with CVS Caremark® and PrudentRx on a program that helps lower your out-of-pocket costs to \$0 for eligible specialty medications by using manufacturer coupons. Specialty medications include drugs prescribed for some rare diseases, and they typically cost several hundred dollars per month.

PrudentRx is an optional benefit for self-funded groups in Idaho, Montana, and Oregon. See your benefits materials, or check with your benefits administrator to see if this program is available to you.

**There is no cost to participate in the PrudentRx program.** However, if your organization participates in PrudentRx, and you choose not to participate in the program, you will need to pay 30% coinsurance for your specialty medications.

## How to enroll

If an eligible drug is prescribed to you, you'll be automatically enrolled in PrudentRx, but additional steps may be needed. Look for mail from PrudentRx; if you don't respond to their letter, they'll call you. You can also contact PrudentRx at **800-578-4403** to finalize your enrollment in the program, or to opt out.

## Eligible drugs

The PrudentRx specialty drug list has more than 200 medications. You can see if your specialty medication is included by visiting [PacificSource.com/find-a-drug](https://PacificSource.com/find-a-drug). On our drug lists, PrudentRx-eligible drugs include the word "Prudent" under the Restrictions column.

For questions about this program, enrollees should contact PrudentRx at **800-578-4403**.
