Enterprise Policy

PacificSource is committed to assessing and applying current regulatory standards, widely-used treatment guidelines, and evidenced-based clinical literature when developing clinical criteria for coverage determination. Each policy contains a list of sources (references) that serves as the summary of evidence used in the development and adoption of the criteria. The evidence was considered to ensure the criteria provide clinical benefits that promote patient safety and/or access to appropriate care. Each clinical policy is reviewed, updated as needed, and readopted, at least annually, to reflect changes in regulation, new evidence, and advancements in healthcare.

Clinical Guidelines are written when necessary to provide guidance to providers and members in order to outline and clarify coverage criteria in accordance with the terms of the Member's policy. This Clinical Guideline only applies to PacificSource Health Plans, PacificSource Community Health Plans, and PacificSource Community Solutions in Idaho, Montana, Oregon, and Washington. Because of the changing nature of medicine, this list is subject to revision and update without notice. This document is designed for informational purposes only and is not an authorization or contract. Coverage determinations are Member policies differ in benefits and to the extent a conflict exists between the Clinical Guideline and the Member's policy, the Member's policy language shall control. Clinical Guidelines do not constitute medical advice nor guarantee coverage.

Background

New and emerging medical and behavioral healthcare procedures, pharmaceuticals, and devices (collectively "technologies") are often prescribed by physicians and/or marketed to the public before FDA or other government agency approval, or research is available in peer-reviewed literature documenting efficacy, safety, and long-term positive outcomes.

New and emerging technologies are reviewed by the New Technologies and Operational Criteria (NTOC) Committee which is chaired by a PacificSource Medical Director. The PacificSource Behavioral Health Medical Director or behavioral healthcare professional designee is involved in the decision-making process for behavioral healthcare services. Pharmaceuticals are reviewed by the PacificSource Pharmacy and Therapeutics (P&T) committee.

The NTOC Committee bases its recommendation of coverage on review and evaluation of the following resources:

- Available peer-reviewed and evidenced-based literature
- Survey of standards of care and coverage
- Consultation with specialists and expert professionals
- PacificSource group and individual contracts
- Medicare and Medicaid requirements

This "New and Emerging Technologies – Coverage Status" policy outlines the evaluation process of new and emerging technology as well as coverage status of items considered experimental, investigational, or unproven.

Procedure

Commercial

Evaluation Process

The NTOC Committee reviews and evaluates new technology and new application of existing technology of medical and behavioral healthcare procedures and devices. NTOC Committee members represent key departments and stakeholders who have operational insight or responsibility for applying the criteria developed by the Committee. A PacificSource Medical Director chairs the NTOC Committee and ensures the Behavioral Health Medical Director or behavioral healthcare professional designee is involved in the decision-making process for behavioral healthcare services.

Agenda items for the NTOC Committee to review for coverage status are collected from multiple sources, which include, but are not limited to:

- New CPT or HCPCS codes
- New FDA approvals
- Provider inquiries
- Reports of new technology acquired by a community provider or anticipated to have widespread acceptance
- Utilization reviews and trends
- Vendor requests – vendor requests for reassessment of coverage position are limited to an annual review unless there is a change in FDA status or Hayes, Inc. rating

To inform its decision-making, the NTOC Committee reviews peer-reviewed and evidence-based information, which indicates if the technology is in general use or a community standard, is under continued scientific review (testing/research), is shown to have a demonstratable benefit, or is shown to be safe and efficacious). The reviews may consist of the following:

- Technology assessment consisting of:
 - Information from appropriate government regulatory bodies such as Food and Drug Administration (FDA) and Centers for Medicare & Medicaid Services (CMS)
 - FDA approval alone, is not a basis for coverage
 - Assessment of peer-reviewed literature and their conclusions concerning:
 - Effect of the technology on health outcomes, with emphasis on random controlled clinical trial outcomes
 - Evidence comparing new technology to established alternatives
 - Results attained outside of investigational settings, with emphasis on studies that were not underwritten by the manufacturer or other sponsor with financial interest in the service or technology
 - Reports on long-term studies indicating improved health outcomes and/or clinical trials in process or recruiting
- Information available from evidence-based resources may vary depending on treatment procedure or device. The evidenced-based resources, which rely on the judgment of experts,

include the following resources (additional resources may be reviewed as necessary based on the technology being reviewed):

- Agency for Healthcare Research and Quality (AHRQ)
 - Carelon Medical Benefits Management Clinical Guidelines, formerly AIM (AIM Specialty Health) Clinical Guidelines
 - Alliance of Community Health Plans (ACHP)
 - American College of Radiology® (ACR)
 - American Hospital Formulary Service Drug Information (AHFS® DI™)
 - Bree Collaborative – Foundation for Health Care Quality
 - Centers for Disease Control and Prevention (CDC)
 - Cochrane Collaboration
 - Facts and Comparison®
 - Hayes, Inc., and Hayes Genetic Testing Evaluation Service
 - MCG Health
 - MEDLINE® (component of PubMed®)
 - Micromedex®
 - National Comprehensive Cancer Network® (NCCN)
 - National Institute for Health and Care Excellence (NICE)
 - Oregon Health Evidence Review Commission (HERC)
 - Professional Societies Recommendations and Practice Guidelines
 - UpToDate®
 - U.S. Pharmacopeia Dispensing Information
 - Washington Health Technology Assessment (HTA)
 - Washington Health Technology Clinical Committee (HTCC)
- Survey of similar market carriers and their published coverage position and/or medical policy concerning the service of technology under review
 - PacificSource utilization and authorization data, as available and applicable

The PacificSource Medical Director may seek input or consult with specialists and professionals who have expertise in a specific technology, when additional information is needed.

The NTOC committee, which includes a Medical Director, makes a determination based on the review of the technology that results in either:

- A covered service, which may include developing specific clinical guidelines criteria
- Experimental, Investigational, or Unproven (E/I/U) determination, which is added to the “New and Emerging Technologies – Coverage Status” policy or as an E/I/U item to an existing policy related to the technology reviewed
 - A technology may be indicated for archival (i.e., remains unproven and will not be reviewed annually unless upon request) when the following conditions are met:

- The scientific evidence does not support clinical efficacy of the technology demonstrated by ONE of the following:
 - There is no general use within the medical community, i.e., the technology does not meet community standards
 - There have not been clinical studies for five or more years, indicating the technology is no longer under scientific review
 - The technology has not been proven to have a demonstratable benefit or been shown to be safe and efficacious
- Claims utilization indicates PacificSource has not received a request for a period of at least two years
 - The unproven technology which has been determined to be archivable, will be moved to an excel sheet (NTOC Agenda Review Schedule) on the [Special Function SharePoint site](#) and noted as archived in the modification history along with associated codes

Quality Oversight

The “New and Emerging Technologies – Coverage Status” policy will be reviewed at least annually.

In addition, an annual report summarizing the NTOC review activity is presented to our Clinical Quality and Utilization Management (CQUM) committee, which consists of external providers and PacificSource Medical Directors, for review.

Medicaid

PacificSource Community Solutions (PCS) follows Excluded Services Guidelines E1 and E2 of the OHP Prioritized List of Health Services for guidance on New and Emerging Technology.

Medicare

PacificSource Medicare follows CMS guidelines and criteria. In the absence of CMS guidelines and criteria, PacificSource Medicare will follow internal policy for determination of coverage and medical necessity.

Experimental/Investigational/Unproven Determinations for Coverage Status

The new and emerging medical technologies, in the following list have been determined by the NTOC Committee to be experimental, investigational, or unproven (E/I/U) and therefore are not covered. The impact of these technologies on health outcomes has not been established as the current scientific evidence is either not yet sufficient or does not support clinical efficacy.

The NTOC Committee has the authority to add new technologies or revise the determinations listed below based on additional review of current scientific evidence, advice, and recommendations by the NTOC Committee.
