Our health plan products are a unique combination of networks and plan designs to fit the needs of you and your family. For 2020 we’re offering two new products: **Navigator** and **Voyager**. The county where you live determines which one of these you can enroll in.

These new products are part of our continued effort to simplify how you make informed decisions about your health and to keep you engaged with your healthcare providers. The products further refine our mission to provide you with quality of care, accountability, access, affordability, and member choice.

Your product’s provider network determines which doctors, hospitals, and other healthcare providers are covered by in-network benefits for you. All of our Navigator and Voyager products also offer out-of-network benefits, for more freedom and choice.
Navigator is our primary coordinated care product, where a member’s personal provider is navigating care within a coordinated network of health professionals who are focused on the individual throughout their health journey.

Navigator products are designed to support member engagement, self-management, and promote shared decision making with providers.

Navigator gives access to a broad array of in-network providers, including local providers, providers within our four-state area, and those available nationally through contracts with First Health, and in Alaska through contracts with First Choice Health.

Our provider partners give members personalized care through high-quality health management and help members better understand the costs associated with their health.

Navigator products feature in-network coordinated care provider partners in each of our four states.

**Idaho:**
- Boise
- Twin Falls

**Montana:**
- Billings
- Kalispell
- Missoula

**Oregon:**
- Bend
- Portland Metro

Voyager is a preferred provider organization, suited for people who prefer a more self-directed experience.

Voyager’s four-state area features in-network providers statewide, and in other states.
