More for less from our Navigator products

Navigator is our clinically integrated product, where a member’s care is navigated within a coordinated network of health professionals. Navigator promotes better member engagement and shared decision making with providers.

Navigator grants access to a broad array of in-network providers, including local primary care physicians within the four-state area, and those available nationally through contracts with First Health®, and in Alaska through contracts with First Choice Health™.

Navigator is available for purchase by businesses headquartered in the following counties: Clark, Pierce, and Spokane.

Focus on Vision

Our vision plans focus on wellness and prevention.

Vision for kids

All of our medical plans include full coverage for in-network pediatric eye exams. Out-of-network eye exams are covered up to $50 with no deductible. While members pay 100% of fees in-network, they receive a 25% discount on out-of-network fees. For more details on out-of-network benefits, please contact your broker or our team for a quote.

Vision for adults

Many of our medical plans include coverage for adult eye exams and vision broadband. Vision broadband is an in-network, comprehensive eye exam. The in-network fee is $20. Out-of-network eye exams are covered up to $80 with no deductible. 50% cost sharing applies for adult vision hardware, up to $150.

Freedom to choose with our Voyager products

Voyager is a preferred provider organization, suited for a company culture that prefers a more self-directed experience.

Voyager includes a broad array of in-network providers from PacificSource in Idaho, Montana, Oregon, and Washington, as well as nationally through contracts with First Health®, and in Alaska through contracts with First Choice Health™.

Voyager is available for purchase by businesses headquartered in all Washington counties.
