

## Facts About **Immunizations**

Immunizations are a key form of preventive care. And they're not just for kids—adults also have a series of recommended immunization vaccines. Here's a quick fact about vaccines:

### Vaccines are safe.

In spite of fear around vaccine safety, vaccines are actually very safe. Any severe reactions to vaccines are closely monitored and investigated. According to the World Health Organization: "You are far more likely to be seriously injured by a vaccine-preventable disease than by a vaccine."
